Landscape Plans Without Cost to You

Many years ago our Mr. Paul Stark, who received his landscape training at Cornell University, conceived the idea of gathering together practical, trained experts. These men have graduated from the leading Landscape Colleges from different parts of the U.S. They have wide knowledge of the climate, soil and plant requirements of the different sections of the country.

This plan was carried out and as a result our large corps of graduate Landscape Architects has designed many thousands of plans for places of all sizes and kinds from the Atlantic to the Pacific and from Canada to the Gulf.

Thousands of home owners, whose places probably would otherwise have gone un-planted, have greatly profited through the Stark Plan of Landscape Service—at a great saving of expense and with much

satisfaction and pleasure from a well designed Landscape planting.

Stark Bro's send with every Stark Plan, complete, easy-to-understand directions for staking out and planting so that anyone without previous experience can correctly carry out the plan. This plan costs you nothing IF you buy the necessary trees shaden with the plan in t trees, shrubs, hedges, vines or rost Stark Bro's.

Look through the other pages of this brochure and NOTE HOW REASONABLE OUR PRICES ARE.

Send us a photo of your home as it now is —also make a rough sketch or map of your home grounds, showing the position of your home, outbuildings, garage, etc., and our Landscape Architects will begin planning for you at once.

AFTER

You will admit that this is a FACT.

WE receive proof of its truth every day of the year, almost, for we are constantly in receipt of letters like

"I ordered the goods just as your plan called for and they are fine. My place sold high on account of the landscape work done."—E. L. Brock, Mt. Vernon, Illinois.

The vast majority of our clients

have found it advantageous to make theirs a Stark proposition from start to finish, including the free specifi-cations and simple directions for carrying out the planting. In this way, there is no dividend responsi-bility and the owner knows just exactly what he can depend on. Furthermore, it is economy because Stark trees, evergreens, shrubs, vines, roses and plants are very moderate in price, lower than many and no higher than any who furnish good stock.
